One sensible ac often atomes for a number of folles. In this light in at be regarded a step which the Most Revered Dr. Cullen has just taken in connection with what is very correctly designated the MoManus face. Poor McManus was a follower of Mr. Smith O'Brien in the disastrous attempt at a rising in 1848. It appears that according to a programma frawn up by a remnant of the Young free and party, to whose custedy the ben's of McManus have been consigned by their fellow pariots in California, several anti-fritish demonstrations were a ranged to take place in the principal towns through which they are to be conveyed. A grand cathedral service, with highly spiced orations, was included in the arrangements for Dublin; but what was the indigual of the projectors when they learned that Dr. Cullen would not permit the athedral to be used for such a purpose. Entreadies failed to move him, deputations were refused admittance, and, in despair, they boscoght betty to hold the exhibition in the large chapel of Whitefrier street, which is under the control of Dr. Spratt. Here, however, the patriots met with a similar rebuilf, and Father Spratt shut the door in their faces.

The Count De Paris an Author as well as a Soldier.

A letter from London in the ind pendance states that the catalogue of the library of the British Museum has been enriched with a new name, that of the Count de Paris, as author of a work entitled, "Damas et Le Liban." The book, of which only two hundred copies have been struck off or private friends, is said to be remarkable for its elegance of style.

The hawver given was, that hitherto the Swiss have never been prohibited from enering that army, and that it was consequently not necessary for the Council to grant permission; that it would be contrary to the law to form in America Swiss corps under their national flag, but that, individually, every one might go where he thought proper.

The Silk Trade of France Improving. [From Galignani's Messenger, Oct. 24.]

A letter from Vaience (Disme) says:—The silk trade continues active, though perhaps with rather less business doing than ten days ago, but prices just as firm. The news from Lyons is good; mury sales have been made on the spot, and fresh orders are arriving. At Marseilles the silk market is in a favorable position, and some large sales of coccous effected.

cutting of it has been effected under the most favorable circumstances.

From official papers lately published it appears that it was by the law of the 28th of April, 1316, that the government reserved to itself the monopoly of the sale of tobacco, and in 1819 the revenue was 64,000,000f, in 1829, 66,500,000f, in 1847, 117,500,000f, and for 1822 it is estimated at 2.25,400,000f, of which, after deducting 65,340,000f, for purchases, and 16,000,000f, for oxpenses of the tobacco department, there will remain a clear sum to the government or about 162,000,000f. Calculating shat the retuiers obtain on an average twoirs per oun, the consumption of tobacce is France accasions an outlay of about 250,000,000f, annually. The law of the 3d of July, 1852, has manualized the government monopoly of tobacco to 1863. About haif the quantity required is purchased abroad, and the other half in the fourteen departments of France in which the plant is allowed to be cultivated.

The Rebel Privateer in the China Waters. (From the Singapore (Z. I.), Times, August 24.)
Commodore Engle, fing officer of the United States

Hartford until to-mercow, in consequence of receiving infelligence of the report from Shangine, which as published at length in our columns to day, with regard to the fitting

purposes.

Nothing would more delight the gallant Commodore than to capture and pusish see a craft before his return to America. But there seems to be no reliance to be placed on the report, and if there should be such a vessel actually fitted out at any time the United States steam gunboat Saginaw is just the craft to pursue and capture her, the flat thord being too large forwards a purpose. Besides, additional steamers could be chartered at any mement by the United States officers, if required for the protection of American commorce.

Considerable excitewent has prevailed here since the arrival of the shale, but steamer, in consequence of the reported 62 ting out of a Confederate States privateer at Shanghas, an the Unites States g about Saginaw has left in search. The whole affect may prove a canard. She cannot become a privateer unless blank letters of marque are to be had from some agent of the Confederate States, or that her reported master has brought such with him from America. A letter of marque gives the name, size, ris, gons, and number of mone of board the vessel currying the same, when it is obtained out they been furnished compacte for the vessel in question. If, however, the particulars of morated have been filled up in Shanghae, it is not possible blan further decuments of a similar nature may be meritance. TERRIBLE AND THEILLIMO INCIDENTS ELMOVAL OF MORE THAN ONE RESIDENCY TO BE BURNED.

From the Washington Star, Nov. 4.]

This men no, at a very early hour, the E Street Hospital, better known as the Washington Indirnary, was decovered to be on fire. It contained at the time from musty to one hundred sick and wounded so does, and a considerable number of other government patients. The first is a bileved to have originated in a defective five from the furcase, which was beauted in the cellar under the addition which projected from the cellar under the building in the rear. The rooms of the Sister of the Sister were filled with smoke about half an hour after mi night, and the Sister Superior first gave the alarm. They had but if time to hurry on their looking and escape, saving everything but the clothing they had on in the burning unitoning. Their cries brought in the gard, and seen the alarm bourm general. An aged we can, named Mrs. Hassey, who was sent to the infirmary some time since by the Commuscience of Public Buddings, has been massing, but has since been found.

The alarm at no time became general through the city, and many persons living within two or three sparses knew nothing of the fire until this morning. One hour and more after the fire was discovered a single alarm bell was rung, and it was at least an hour after that before any fire engines arrived. By that time the a didtion and the eastern portion of the man budding were enveloped in Hames. FINANCIAL AND COMMERCIAL.

WEDNISDAY, Nov. 6-6 P. M. The public mind is kept in such suspense in regard to the naval expedition, and the movements of our armies, that business is impeded and general dulne's prevails. News of any kind would lead to increased activity. The money market is quite inactive; call loans range from 6 to 7 per cent, and very first class paper sells at about the same rates. In foreign exchange nothing has vet been done for the next packet. The market closed firmly.

Stocks continue steady, the market being in sus pense. Buyers are waiting for news from the fleet and from the army; the bears are doing the same. Private advices from Washington justify the expectation that hostilities will shortly commence on the Potomac; a battle is hourly expected in Missouri; our armies are moving in Kentucky; pending all which movements stock speculators naturally show a tendency to preserve a masterly inactivity. If we are beaten in a battle a decline of one a two per cent may probably be expected-If we are successful, either on the Potomac or in Missouri, our sanguine operators will probably conclude that the war is over, and will rush in to buy. A similar result would probably follow the announcement of the occupation of Bull's
Bay Island and Beaufort, South Carolina, by the
expeditionary force. Meanwhile the European
advices are decidedly more cheerful in regard to
public feeling in Europe on the subject of our war.

Railron appears to be acquiring popularity; it has risen four or five per cent within a few days. The carriers of the three lines which constitute this road were, last year, \$2,064,535. The surplus, after payment of expenses and the interest on the debt, was applied to advances to the Peoria and Oquawka road, which the Chicago, Burlington and Quincy will probably acquire as it acquired the Northern Cross road. By suspending divi-dends during the years 1859 and 1860, and paying only five per cent last winter, the directors have placed themselves in an unusually strong position. They will shortly own a line 200 miles long, excellently situated, and earning over \$2,000,000 annually, which will only stand them in about \$37,000 a mile; their stock will stand at about \$4,600,000, and their bonds at \$5,500,000. In 1857, the year after the formation of the Chicago, Burlington and Quincy company, it paid 15 per cent in dividends; the friends of the property seem to think it not unreasonable to expect 12, or at least 10, per cent regularly, after the nortgage on the Galesburg and Burlington road

has been foreclosed.

Mr. Cisco reimbursed the banks half a million to day, and called upon them for ten per cent on account of the second fifty million loan. Mr. Chase states that the popular subscription to the 7.30 loan amounts to a million a day. The following was the business of the Sub-Treasury to-day:-

BEEF CATTLE.

The "flat, stale and unprofitable" business transacte at Bull's Head last week had the effect to frighten of some of the more timid dealers; and, as a consequence the supply on sale in the several yards was more in ac cordance with the legitimate requirements of the "frater aity" in this city and its suburban surroundings-Brooklyn, Williamsburg, Jersey City, Astoria, Hobo kee, &c. Of course prices were higher; but they were in no wise exorbitant, and afforded only a fair remuneration. But some of the butchers who rank as second or third rate complained who rank as second or third rate complained of the high prices, though the first class butchers, where receive to difficulty in selling at a fair profit, madiately or no objection to the alvanced pretentions of holders, though it took them somewhat by surprise. The market was much better, and the range of prices want to save mide. The range was from 6½c. to 8½c. a sc.; with compartively few sales at the extreme rate the bulk of the sales were at about 8c. SHEEF AND LAMES.

The very heavy recepts during the past few weeks do not appear to have excited a very unfavorable indiaence on the market, and all good grades continue to find one way sale at prices showing very little variation. Considering all things, the market is better than usual, and holders manifest much firmness in all their operations. The following sales, in lots, at Chambrille's represent the maket at the other yards as clearly as may be. The range of p. ic. s may have been a little wider at the other yards, but the general sales we cat about the same rates.
